Climb (Hacklahoma 2026)

A Pomodoro focus app with a reward and penalty system for phone use, built with my team at Hacklahoma 2026 in Expo, React Native and TypeScript.

app hackathon Feb 2026

Author	Sao Aphisith Sithisack	Date	February 1, 2026
Tools	Expo, React Native, TypeScript	Online	https://saosith.github.io/projects/climb-hacklahoma-2026/

Built. Built during the hackathon and demoed live. No measurements are recorded on this page.

What it is

Climb is a Pomodoro focus app my team built at Hacklahoma 2026. It rewards focused work sessions and adds a penalty when you spend time in distracting apps. We built it with Expo, React Native and TypeScript. The photo is from the demo, with the app running on a phone and the code on the laptop.

Status: built and demoed at Hacklahoma 2026. The code is on GitHub.
